

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: GO enrichment analysis on the top 100 genes with significantly differentiated variance but no mean differentiation after Bonferroni correction. P-values were calculated by hypergeometric distribution and adjusted for multiple comparisons using the BH method.

File name: Supplementary Data 2

Description: GO enrichment analysis on the top 100 genes with significantly differentiated variance in OneK1K. P-values were calculated by hypergeometric distribution and adjusted for multiple comparisons using the BH method.
